Project Status	Green
Status Description	The project is currently in the green status, I should be able to complete any leftover work by the end of the week.

Activities—During the past sprint cycle

- Created the database information
- Coded a case details page
- Implemented link for “Leave a tip” option
- Figured out how to use the app on an Android device

Project Issues

An issue I came across when working with the database is that it is actually quite difficult to integrate PHP and MySQL into Kivy projects, which is not something I expected to be a problem. However, I think one of the reasons this was a bigger problem for me is because I based my entire code functionality on Kivy, whereas I’ve come to realize it serves more of a design purpose instead.

Project Changes

There have been no changes since the last Progress Report.

Activities—Planned for Next Week

As the project has come to an end, there are no more activities planned for next week, other than tying up some loose ends before Dec 6.
