Project Status report

Name:	Qurrat Ulain
Community (UN SD goal):	#16 – Peace, Justice and Strong Institutions, and #4 – Quality Education
MVP #	2
Sprint cycle dates:	Nov 2 – Nov 16

Project Name	Find
Blurb	This app aims to facilitate the process of finding missing people or those on the run from the police. It will have a knowledge aspect to it that will address some of the underlying themes and issues targeting vulnerable people in Regina such as poverty and racism. This app focuses on promoting peace and inclusive societies for sustainable development and providing access to justice for all, following the 16th UN Sustainable goal, with a minor focus on goal #4, Quality Education.
For Week Ending	November 19, 2021
Project Status	Yellow (but close to Green)
Status Description	My project is still in the Yellow zone just because of some of the formatting work that's left. Overall, I have a good idea of the work that needs to be done to code the rest of the pages on the app, but I'm not exactly where I wanted to be at this point in the semester. To get back in the Green zone, I plan on spending an extra few hours in the week to finish formatting the pages I have finished coding, and adding new elements.

Activities—During the past sprint cycle

- Since the start of reading week, I completed the formatting for the main menu of the app
- Finished the main code for the Statistics Page
- Compiled various statistics into graphical formats
- Created a "Fast Facts" page
- Increased the accessibility for the Discussions Page

Project Issues

At this point in the project, there aren't any major issues. The only concern I have right now is figuring out how to dynamically add statistics/information from the database. My plans to resolve this issue center around doing research about integrating PHP/MySQL databased into KivyMD.

Project Changes

There haven't been any changes to the project, except for the addition of a "Fast Facts" Sub-Page.

Activities—Planned for Next Week

For the next week, I plan to complete the code for the Statistics, Discussions, and Settings Page. I will also research and implement dynamic elements to the app.

Reflection

Do you feel "on track"?
- While I am still a little behind in the schedule I had planned initially, I think I will be able to catch up soon.

What progress do you particularly feel good (great) about?
- I feel really great about the having compiled and created the statistics page

What barriers (if any) do you feel is/are a current impediment to success?
- Currently, I don't feel like there are any barriers to my success

What help (if any) do you require to move positively forward?
- While I don't require any help, I will be working on figuring out how to incorporate dynamic databases into my app

What questions or concerns do you have (if any)?
- N/A
